

Note Regarding the Rambox

The HSP Roll R Cover to suit the Ram box currently only works with Vehicles sold through Ram dealerships. All Rams come with an internal rail system mounted to the top of each side of the tub, this rail is crucial in the mounting and install of our Roll-R-Cover. To identify you can use the images below.

Vehicles direct imported from the US often have a silver rail which is not compatible with the Series 3 Roll R Cover. We are working on a solution for this which will come out Mid to Late September 2022
