

The HSP Roll R Cover to suit the Ram box currently now works with all **DT** Series, Ram 1500 Rambox variants however some vehicles will require an additional fitting kit (RB4-RRS). This document outlines the differences in vehicles and provides the relevant part numbers to ensure customers order the correct components for their respective vehicles

All Rams come with an internal rail system mounted to the top of each side of the tub, this rail is crucial in the mounting and install of our Roll-R-Cover.

The vehicle pictured first features the **black rail** found on the majority of vehicles purchased through RAM Trucks Australia. Our Roll-R-Cover with part number RB4RS3 is suited to work with these vehicles with no further fitting kit necessary

Parts Required:

RB4RS3 - Roll-R-Cover to suit RAM with Rambox (\$3600 RRP)

The second image is an example of vehicle with the alternate, **silver rail** that sits slightly below the top of the tub. HSP is pleased to say that we now have a fitting kit to enable our roll top to work with these vehicles. Customers with these cars will require fitting kit; RB4-RRS in addition to Roll-R-Cover RB4RS3

Parts Required:

RB4RS3 – Roll-R-Cover to suit RAM with Rambox (\$3600 RRP)

RB4-RRS – Rambox fitting kit to suit Silver Rail (\$200 RRP)
